

FREE Configuration & Performance Audit with Virtela's Remote Monitoring and Management (RMM) Services

Virtela's is offering a Free Configuration and Performance Audit to assess your network performance!

Virtela will remotely perform a detailed inventory and configuration analysis of your LAN/WAN devices, which will identify configuration and performance affecting issues. The Virtela RMM Audit is designed to assess the condition of your network and provide recommendations to improve stability and performance. As part of the service, Virtela will setup a management VPN between your network and the Virtela Global Operations Center, polling devices to gather data for five days. Virtela then correlates the data and provides you with recommendations on network and device changes that will improve your overall performance.

Terms of the Promotion:

- New RMM customers only
- Must be part of an order for Virtela Remote Monitoring and Management of at least 20 devices
- Must have a contract and order form signed by December 31, 2009
- Must sign a minimum 2 year service term agreement
- Supported devices: Switches, routers, firewalls
- Supported vendors for audit: Cisco, Juniper, Nortel, Foundry, Alcatel, Checkpoint

Benefits of Virtela's Audit Services:

- A complete inventory of devices including OS version, serial number and chassis
- An analysis of device configurations comparing to a database of over 150 best practices rules
- Comprehensive reports prepared and presented by a Virtela engineer
- Actionable recommendations for better network performance and higher network uptime
