

Announcing Virtela's 2008 iPass Promotion

Mobile Data plus Unlimited Global WiFi, Hotel Broadband and Dial for \$70/user plus Free Service Until December 31, 2008!

Virtela is offering an iPass promotion to both new and existing Virtela customers. Sign a Virtela contract by December 31, 2008 and receive a packaged bundle of a US Mobile Data card service (Verizon network) plus, unlimited global Mobile Office services consisting of WiFi, hotel broadband, dial, and toll free services. The bundle price is \$70 per user, per month, representing over a 40% savings when purchased independently. Plus, monthly service fees will be waived until December 31, 2008!

Terms of the Promotion:

- Includes iPC Universal Client
- Free Mobile Data Card included
- Contract must be signed before December 31, 2008
- Minimum 30 user purchase
- Mobile Data Card service is US based only – Network A (Verizon)
- Contract term must be a minimum of 24 months
- The contract term will begin January 1, 2009
- Standard set-up fees apply

About Virtela:

Virtela Communications Inc. delivers award-winning network and security solutions to many of the world's largest and fastest-growing multinational companies. Currently serving customers across six continents, Virtela's network reach spans more than 190 countries. Virtela's unique Global Service FabricSM offers the foundation for delivering critical applications via the company's acclaimed service methodology, with a services suite that includes MPLS- and IP-based virtual private networks (VPNs), security services, remote monitoring and management of WAN/LAN infrastructure, and converged services (data, video, voice).

Highlights of the Virtela iPass solution include the following:

- Unsurpassed global remote access coverage
- Intuitive client combines all access methods creating unified end user experience
- 24x7 monitoring, management, troubleshooting of entire solution
- Single point of contact for billing across all underlying vendors – eliminates day pass charges
- Solutions: VPNs, load balancing, WAN acceleration, intrusion prevention, and managed firewalls
- Solutions for business continuity, mergers and acquisitions, partner extranets, and more
- Multiple end user profiles allowing access to specific applications based on end user attributes
- Custom designs avoiding network over-engineering to accommodate disasters or pandemics.
- Comprehensive reports that meet compliance efforts for Sarbanes-Oxley, HIPAA, and GLB
